

Kipuke's Policy Platform – Domestic & Foreign Policy

1. National Security and Strategic Strength

- National security extends beyond military might; it requires systemic resilience in **food supply chains, energy infrastructure, education, and community safety**.
- Support domestic agriculture with subsidies, infrastructure investment, and technology adoption to secure **long-term food sovereignty**.
- Achieve **energy independence** through diversified domestic energy production, including renewable and traditional sources, minimizing reliance on foreign suppliers.
- Maintain a **principled, high-readiness military** with modernized capabilities; enforce zero-tolerance policies for terrorism and asymmetric threats.
- Provide tangible support to veterans and military families, including **property tax exemptions and targeted reintegration programs**.

2. Economic Freedom, Fiscal Responsibility, and Workforce Development

- Promote **capital formation** through lower capital gains taxes and regulatory certainty to incentivize investment and entrepreneurship.
- Advocate for **reduced federal interest rates and monetary policies** that support economic growth while controlling inflation.
- Implement **tax structures and trade policies** that reward productivity, innovation, and reinvestment, not wealth hoarding.
- Maintain **limited, efficient government** that safeguards property rights, enforces contracts, and provides a regulatory framework without stifling economic activity.
- Invest strategically in workforce development: **expand STEM programs, vocational training, trade schools, and competitive teacher compensation** to ensure a 21st-century labor force capable of sustaining innovation and national competitiveness.

3. Healthcare, Reproductive Rights, and Human Capital

- Transition toward a **market-based healthcare system** that incentivizes competition, reduces administrative overhead, and expands affordable options for families.

- Integrate **incentive structures for healthcare professionals**, supporting retention and equitable distribution of talent across urban and rural areas.
- Protect **women's reproductive autonomy** by ensuring privacy, medical discretion, and access to healthcare decisions without undue political interference.
- Recognize healthcare, nutrition, and education as **human capital imperatives** critical to national security and economic productivity.

4. Immigration, Rule of Law, and Humanitarian Balance

- Implement **smart border security**, combining technology, personnel, and intelligence to prevent illegal entry and criminal exploitation.
- Promote **regulated, merit-based immigration policies** that attract skilled workers and honor asylum claims without compromising public safety.
- Balance **compassion with enforcement**: protect citizens while offering legal pathways for immigrants contributing to the economy and society.

5. Digital Economy, Innovation, and Regulatory Oversight

- Enforce **accountability in media and social platforms**, ensuring transparency, fact verification, and mitigation of algorithmic misinformation.
- Reinforce the **cryptocurrency and blockchain ecosystem** to prevent money laundering, foreign interference, and systemic financial risk, while enabling technological innovation.
- Promote **digital infrastructure and cybersecurity initiatives** to safeguard commerce, personal privacy, and democratic institutions.

6. Political Reform, Accountability, and Party Renewal

- Eliminate **dark money, foreign influence, and systemic corruption** in government contracting, lobbying, and elections.
- Build coalitions of **independent-minded legislators and local leaders** to prioritize stewardship of public resources over partisan or corporate agendas.
- Reform the Republican Party: maintain commitment to principles of liberty, responsibility, and free enterprise while rejecting extremism and polarization.
